

CABINN HOTELS

All you need to sleep since 1990

Education

Training and education is a natural part of CABINN. We have educated 30 different nationalities and every year we recruit and welcome new.

Reducing water usage

In collaboration with our guests, we are minimizing the number of towels washed daily.

For a brighter tomorrow

We only use low-energy LED lights. All halogen light bulbs are being replaced to further reduce the electricity consumption.

Healthy work environment

The CABINN staff working in our 11 hotels stay with us for many years. This speaks for itself. Ensuring equal rights and a healthy workplace focusing on stress handling and no heavy lifting among many others.

Nordic Eco-friendly cleaners

CABINN only uses detergents carrying The Nordic Eco-label.

Climate neutral regulation

The 1.200 rooms at CABINN Copenhagen are regulated using "remote cooling" where sea water is used as the cooling aid. This cooling technique is completely climate neutral.

We build on a sustainable foundation

Sustainability is a very big part of the CABINN concept. This is clearly shown in our 11 hotels. They are conceived, designed and built to give a positive hotel experience with low energy consumption. Actively collaborating with regulatory bodies as well as ongoing sustainable sourcing and investments CABINN is a green player.

A helping hand

CABINN has throughout the years supported different humanitarian organisations. When staying at CABINN you support them too.

Sleep tight with a clear conscience

CABINN's linens are washed and treated according to Eco-label criteria.

In your room we sort it out together

Leave all bottles, both glass and plastic, on the table. Leave all cardboard under the table. Bring electronics and batteries to the Reception. The rest you can leave in the trash can.

Smart living less energy

We use very little energy, because our rooms are small as well as highly insulated. Furthermore, our rooms have no more than the required number of light fixtures.

Co2 free transportation available

Rent a CABINN bike to explore the city.

Good green morning

Minimal use of plastic and reducing food waste is our goal. Read more about this, and The Danish Veterinary and Food Administration's Keyhole label, which we offer for healthier choices, in our Breakfast cafés.

Water conserving filters

No bathtubs or whirlpool baths – instead, all CABINN bathrooms have showerheads fitted with water-preserving filters.

Green oasis in the city

A car-free park with trees, bushes and plants will cover 6.000 m² on CABINN Copenhagen's rooftop. CABINN uses rainwater for watering the green areas at all our hotels.

COPENHAGEN • AARHUS • AALBORG • ODENSE • ESBJERG • VEJLE

CABINN Hotels A/S welcomes the 17 FN Global Goals. We regularly implement new projects which are build on our solid and sustainable foundation. Our aim is to constantly improve our routines and procedures as well as products and services and walk the green talk. Read more about CABINN's environmental policy at cabinn.com.
